—

I can say I measure based on quality, not quantity, being where my experience lies in terms of overall knowledge and an extensive set of skills that have been crafted over time. My confidence lies in resolving, creating solutions and meeting goals. Attaining these three weren't easy but with a lot of hard work, early mornings, late nights and **coffee**, I've come to the conclusion I would be best put in a position to execute all three on a daily basis. I would like to implement my strategies in a place of work where success is measured by quality of understanding to do and quantity of learning to know.
